

St Columba's  
Hospice Care

# Getting ready to leave our care

Helping you plan your next steps

## Getting ready to be discharged from our care

When you're admitted to St Columba's Hospice Care, our team will start by getting to know you and how best to manage your symptoms. Your multidisciplinary team might include medical staff, nursing staff, pharmacy staff, physiotherapists, occupational therapists, social workers, counsellors and chaplains.

When your condition has stabilised and you can be supported safely elsewhere, you no longer need our inpatient palliative care. This means we will make plans to support you to move back home or to an alternative place of care.

We welcome your comments on this leaflet and the services we provide. You'll find our feedback portal in reception and you can comment via our website.
